WORK EXPERIENCE

Software engineer

CODA TECH [09/2021 – Current]

City: Skopje, Pristina, Stuttgart

Country: North Macedonia

During my tenure as a Senior PHP Developer at CODA.tech in Skopje, my role involved precise coding and focused contributions:

1. PHP8: Demonstrated proficiency in the latest PHP version, harnessing its advanced features for efficient and modern code development.
2. Symfony4/6: Led the implementation and optimization of Symfony4 and Symfony6 frameworks, ensuring robust and scalable applications.
3. React: Applied React to enhance the front-end development, creating dynamic and interactive user interfaces.
4. MongoDB: Utilized MongoDB for effective and flexible data storage solutions, adapting to the evolving needs of the applications.
5. MySQL: Employed MySQL for relational database management, optimizing data structures and ensuring seamless data retrieval.
6. Elasticsearch: Successfully implemented Elasticsearch, enhancing search functionalities and improving data retrieval speed.
7. Legacy Code Upgrade: Spearheaded the upgrade of existing applications from legacy code to cutting-edge technologies, ensuring compliance with industry standards and enhancing overall system performance.
8. Pimcore Implementation: Played a key role in the development and implementation of a new application using Pimcore, showcasing adaptability to diverse technologies and frameworks.
9. AWS infrastructure implementation and CI-CD

Throughout my time at CODA.tech, my focus on PHP8, Symfony4/6, React, and the integration of advanced technologies like Elasticsearch and Pimcore underscored my commitment to staying at the forefront of technological advancements and delivering high-impact solutions.

Software architects

Sales.rocks [11/2020 – 07/2021]

City: Skopje

Country: North Macedonia

For 6 month i have remasterd the existing applicaiton with precise and flexibility in implementation:

1. Laravel: Developed and maintained backend functionalities using the Laravel framework.
2. Vue.js: Implemented dynamic and responsive user interfaces through Vue.js for seamless front-end experiences.

3. AWS: Leveraged Amazon Web Services (AWS) to deploy, manage, and scale applications in a cloud environment.
4. MySQL: Designed and optimized database structures, ensuring efficient data storage and retrieval.
5. TDD (Test-Driven Development): Applied Test-Driven Development methodologies to ensure the reliability and stability of code.
6. JWT (JSON Web Tokens): Implemented secure authentication and authorization mechanisms using JSON Web Tokens.

My focused proficiency on Laravel and Vue.js allowed me to contribute significantly to the development of robust and user-friendly applications. This period was marked by my commitment to employing industry best practices, optimizing database performance, and ensuring the security and scalability of applications and to mentor many junior developers on how to do things in these areas.

Software engineer

The Code Connectors [10/2019 – 07/2020]

City: Skopje, Hague

Country: North Macedonia

As a Senior PHP Developer at The Code Connectors in Skopje from November 2019 to April 2020, I spearheaded advanced projects with a primary focus on Laravel, LEMP, LAMP, MySQL, and TDD. My role involved a meticulous emphasis on the Laravel framework, where I played a pivotal role in the development of a bespoke e-commerce solution. Noteworthy achievements during this period include the successful creation of a custom e-commerce platform, showcasing my ability to architect and implement robust solutions tailored to specific business needs. Additionally, I contributed my expertise to various projects, providing innovative and intelligent solutions that demonstrated a keen understanding of industry best practices. My professional dedication extended to implementing best practices, including Continuous Integration and Continuous Deployment (CI/CD) processes, ensuring the seamless and efficient delivery of high-quality software. Throughout my tenure, my unwavering focus on Laravel, MySQL, and CI/CD not only elevated the technical capabilities of the team but also contributed to the successful execution of impactful and scalable solutions.

Software engineer

Tricycle LTD [10/2018 – 09/2019]

City: Skopje, Malta

Country: North Macedonia

During my tenure at Tricycle LTD in Skopje from October 2018 to October 2019, I thrived in the role of a dedicated PHP Developer. My coding proficiency extended across PHP, MySQL, Yii2, jQuery, and Vue.js, with an emphasis on Laravel. Within this period, I cultivated expertise in Yii2 and Angular, showcasing a commitment to mastering versatile frameworks that enhance application development. My responsibilities went beyond traditional coding, as I delved into areas such as VoIP, Digital Marketing, Gambling, and Investments, broadening my knowledge and adapting to the dynamic needs of the company. The coding focus during this period involved intricate work in PHP, Yii2, Angular, and SQL, demonstrating my adaptability to different technologies and my dedication to staying at the forefront of industry trends. My time at Tricycle LTD reflects not only technical prowess but also a keen interest in exploring diverse domains and contributing to multifaceted projects.

Software engineer

Pabau.com [03/2017 – 09/2018]

City: Skopje, London

Country: North Macedonia

During my tenure at Pabau.com in Skopje from March 2016 to August 2018, I served as a proficient PHP Developer. My role encompassed a comprehensive range of skills, including coding in PHP, JavaScript, jQuery, MySQL, HTML, and CSS. I actively engaged in developing and maintaining a singular medical application, demonstrating a focused expertise in Fullstack PHP-Javascript development. Throughout this period, I expanded my knowledge base by immersing myself in CRM and MedicalCRM technologies, gaining valuable insights into Load Balancing, Big Data, and Customer Support functionalities. This experience not only enriched my skill set but also allowed me to contribute meaningfully to the development and optimization of cutting-edge medical applications. My time at Pabau reflects my dedication to Fullstack development, my adaptability to diverse technologies, and my commitment to delivering high-quality solutions in the dynamic field of healthcare software.

Web application developer

Profi4Tech [09/2013 – 08/2016]

City: Skopje

Country: North Macedonia

During my tenure at Profi4Tech in Skopje from September 2013 to August 2016, I excelled in the role of PHP Developer. My primary responsibilities centered around the development of ERP and CRM applications, where I harnessed my expertise in PHP and Jquery. My focus on Vanilla PHP allowed me to create robust and efficient solutions for complex business processes. This experience equipped me with a deep understanding of application architecture and a keen ability to optimize code for enhanced performance. My contributions during this period reflect a commitment to delivering high-quality software solutions that align with business objectives.

Web application developer

NRB [03/2011 – 05/2013]

City: Skopje

Country: North Macedonia

Proficient Computer Service Professional with hands-on experience spanning 2007 to 2014, specializing in electrical repairs, robust software maintenance for operational systems, and adept troubleshooting skills. Demonstrated expertise in diagnosing and resolving diverse technical issues while ensuring seamless functionality. Concurrently pursued self-directed learning in web development, acquiring comprehensive skills in coding and delivering numerous successful web-based projects. Known for a proactive approach to problem-solving, dedication to enhancing system performance, and a track record of delivering innovative solutions in both hardware and software realms.
